

# The Single-Source Provider

Uniquely qualified to handle all of your bus system needs

## A global leader in fully integrated bus systems

As a single-source provider, Avail covers every aspect of your bus system needs, from custom engineering, design, and manufacturing to custom fabrication, installation and maintenance.

Long regarded as the industry expert, Avail Bus Systems represents extensive experience developing custom-engineered solutions for the most demanding industrial, power generation, transmission, and distribution applications.

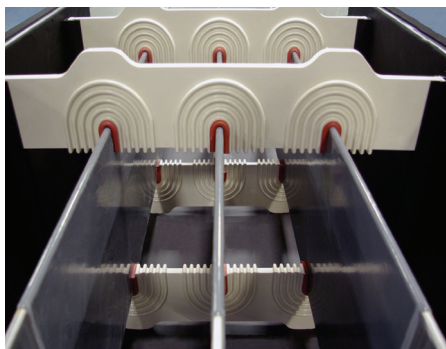

## Custom engineered solutions for greater reliability

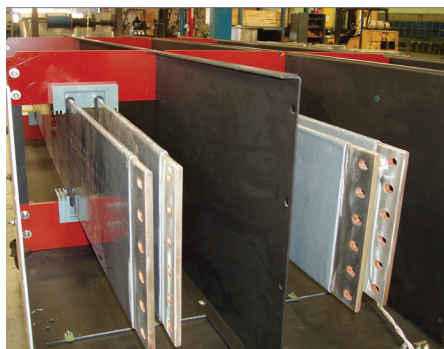

Avail Medium Voltage Bus System designs are custom engineered for ease of installation and optimum performance at the lowest total installed cost. Avail non-segregated, segregated, and isolated phase bus represents innovative designs and custom solutions that provide effective system performance with low maintenance.

### Custom Solutions and Services Include:

- Complete system and design integration
- Forced air cooled designs
- In-house manufacturing, inspection, and testing
- Advanced thermal analysis of any bus system
- Inspection of new or existing bus systems
- Turnkey installation
- Full line of spare parts

*Avail Non-Segregated Phase Bus Systems provide proven cost-effective performance, low maintenance, and ensure greater reliability.*

*Avail Segregated Phase Bus Systems are designed for the application or user preference for decades of reliable service.*

*Avail Isolated Phase Bus System technology reduces enclosure voltage and is the safest for personnel and equipment.*

## Engineered, custom fabrication

Avail's in-house and onsite custom fabrication capabilities provide value-added engineering for cost-efficient solutions unavailable from other bus system suppliers. Our experience with all bus brands allows us to extend asset life through custom-fabricated parts for bus duct repair, refurbishment, or replacement projects.

- Custom fabricated OEM parts and components
- Fabricated flex connectors, coated bus bars, and spare parts
- Reverse engineer exact replacement parts
- Refurbishment of existing parts

## Industry-leading bus services and support

Avail's long experience at the forefront of advanced bus system design and production makes us uniquely positioned to deliver installation and maintenance services for any manufacturer's system. We are the only manufacturer with full-service installation, inspection, maintenance, and emergency response. Avail technicians are on-call 24/7 to respond quickly to customer needs, with one-hour response capability and staff on-site within 24 hours.

- Turnkey bus installation
- Preventive maintenance
- Immediate emergency response and field service
- Replacement, repair, and retrofit services
- Full line of replacement parts
- Upgrades of existing systems

---

## Bus System Replacement Parts

Avail offers a complete line of replacement and upgrade parts to support any medium voltage bus system with 24-hour emergency repair service 866-688-2558.
