

Drop Over Enclosures

Factory-fabricated custom enclosure option

Engineered for infinite configurability and easy installation

The Avail RuggedSpec™ II Drop Over Enclosure addresses the needs of markets requiring protection for electrical and mechanical equipment against environmental hazards, particularly in areas with limited space during construction and expansion projects.

Featuring an open-bottom design with top lifting lugs, the Avail Drop Over Enclosure allows for effortless placement over existing floors, ensuring a rapid and seamless process. The custom factory-fabricated design facilitates easy bolting to existing bases and pads, offering a simple, cost-effective solution. This streamlined installation saves time and reduces labor costs associated with on-site setups. The custom drop-over design also provides infinite configurability, meeting the specific requirements of diverse equipment and spaces while accommodating a wide range of setups and installations.

Ensure uninterrupted operations in the harshest conditions

Avail Drop Over Enclosures offer exceptional protection, making them ideal for customers with weather exposure and corrosion challenges. These Rugged Spec II enclosures protect against environmental hazards like rain, sleet, snow, and water-exposed hose-down environments. With Avail, you can rely on durable protection to ensure your equipment's reliability and optimal performance in various conditions.

Avail's unmatched advantages

Avail Drop Over Enclosures ensure cost-effective and efficient solutions for your needs.

Exceptional Protection

- Offers robust protection against environmental hazards such as rain, sleet, snow, and water-exposed hose-down environments
- Protection against corrosion ensures the longevity of the enclosed equipment

Custom Configurability

- The custom drop-over design allows for infinite configurability, meeting specific requirements of different equipment and spaces
- Manufacturing flexibility accommodates a variety of setups and installations

Ease of Installation

- The open-bottom design with top lifting lugs facilitates easy pick and placement over existing bases and pads
- Ease of installation reduces labor costs associated with on-site setup

Time and Cost Savings

- Ability to transport by flatbed trailer for quick and seamless installation
- Reduced on-site labor and quick installations help minimize project timelines, avoiding costly weather delays

On-Demand Manufacturing

- Can be built-to-ship when needed, eliminating the need for storing enclosures in laydown areas before installation
- On-demand manufacturing approach expedites construction schedules and minimizes potential damage from storage

Factory-fabricated, cost-effective solutions

Avail's factory-fabricated drop over enclosures offer infinite configurability and are easily transported by flatbed trailers for installation. Choosing Avail Drop Over Enclosures cuts labor costs associated with on-site installations and lengthy site build schedules in unknown conditions, avoiding costly weather delays. Avail can build to ship when needed, eliminating the need for on-site storage, reducing potential damage, and further accelerating project timelines. Avail Drop Over Enclosures ensure cost-effective and efficient solutions for your needs.

Built to meet your specifications and schedule

Avail Enclosure Systems is a leading manufacturer of durable, reliable, and modular packaged equipment centers, dedicated to meeting your specific requirements and most demanding schedules. With three manufacturing facilities in North America, our streamlined manufacturing production processes can meet the most demanding delivery schedules. From the harshest environments to the most complex configurations, custom drop over enclosures from Avail Infrastructure Solutions keep equipment protected and running at peak performance.

Enhanced quality for exceptional protection

Avail RuggedSpec II Drop Over Enclosures establish the standard for quality and resilience. Engineered with precision and constructed for enhanced strength, our rugged steel construction provides unmatched rigidity and durability. Featuring interlocking Galvannealed A60 interior and exterior steel panels with fewer fasteners, these enclosures deliver superior strength while resisting corrosion and weather intrusion. Customizable to meet or exceed regulatory requirements in various industries, Avail ensures compliance with all nationally recognized electrical and building codes for enhanced quality and protection.
